About This Webinar

This webinar, presented by OFS, will provide an overview of current in vivo medical procedures performed using lasers and optical fibers. The presentation will begin with a brief history of laser-based medical applications. Speaker Jaehan Kim will describe the types of light-tissue interactions and discuss which wavelengths have been found most useful for different medical procedures. He will also touch on the use of high-power versus low-power lasers.

The webinar will cover different types of medical laser procedures, focusing on in vivo procedures for neurology, ophthalmology, cardiology, and other applications. It will also cover the use and benefits of laser-based imaging applications such as OCT and the use of lasers for cancer detection, endoscopic imaging, and medical sensing. The benefits of the Raman fiber laser, a potentially game-changing technology for medical laser applications, will also be discussed. This webinar will be approximately one-half hour in length.

About the presenter:

Jaehan Kim is a medical market manager at OFS. He joined OFS after receiving an MBA from the University of Connecticut and has served in various roles at OFS for the last eight years. In his current role, he is responsible for managing fiber optic products for the medical market. Before joining OFS, Kim worked as a research engineer in the display industry for six years, bringing new products to market. He has filed 13 patents.

Who should attend:

Researchers, clinicians, optical designers, optical engineers, and technical professionals who design, develop, and/or use lasers for medical applications. Anyone who wishes to learn more about the use of lasers in medicine.

About OFS:

OFS is a world-leading designer, manufacturer, and provider of optical fiber, fiber optic cable, connectivity, fiber-to-the-subscriber (FTTx), and specialty photonics products. It provides reliable, cost-effective solutions for a broad range of applications including medical, telecommunications, industrial automation, sensing, government, aerospace, and defense. These products help OFS customers meet the needs of consumers and businesses, both today and into the future.

Mark Your Calendar

Date: Thursday, March 7, 2019

Time: 1:00 PM - 2:00 PM EST

Space is limited. Reserve your Webinar seat now at: <https://attendee.gotowebinar.com/register/4114615899541496579>

After registering you will receive a confirmation email containing information about joining the Webinar.

SYSTEM REQUIREMENTS

PC-based attendees

Required: Windows® 10, 8, 7, Vista, XP or 2003 Server

Mac® -based attendees

Required: Mac OS® X 10.6 or newer

Mobile attendees

Required: iPhone®, iPad®, Android™ phone or tablet, Windows 8 or Windows Phone 8

More from Photonics Media

Upcoming Webinars

- Emergence of Freeform Optics in Imaging Systems: A Leap Forward, 2/27/2019 1:00:00 PM EST
- Deep Learning in Machine Vision, 3/5/2019 10:00:00 AM EST
- A Bird's-Eye View of AR Coatings, from Concept Through Production, 3/12/2019 1:00:00 PM EDT

Archived Webinars

- Advances in Rapid 3D Imaging of Large Tissue Samples
- SiPM and SPAD: Emerging Applications for Single-Photon Detection
- Materials and Methods for Smart Glass, Smart Windows, and Building Shells
