## Enhancing Robot Performance with Industrial Vision

Wednesday, February 28, 2024 1:00 PM - 2:00 PM EST

[Register Now](#)

In this webinar, Mark Noschang and Renato Osaki from Omron delve into the crucial role of industrial vision in revolutionizing robot performance across various applications. From fixed industrial robots to collaborative robots and autonomous mobile robots, the integration of vision technology has become increasingly vital for enhancing navigation capabilities, product manipulation, and quality verification in manufacturing environments. They explore how vision is used in each robot type, showcasing real-world examples and highlighting the benefits it brings. Discover how industrial vision is shaping the future of robotics and unlocking new possibilities for flexibility, traceability, and adaptability in automation.

### Upcoming Webinars

- [Quantum Efficiency Measurements: Fundamentals for Solar Cell Research, Part 2, 2/21/2024 1:00:00 PM EST](#)
- [Laser & Photonics: An Integral Part of Industrial Innovation, 2/27/2024 10:00:00 AM EST](#)

### Archived Webinars

- [Dual-Comb Ranging for Industrial Applications](#)
- [An End-to-End Approach to the Challenges in PIC Packaging](#)
- [Automation Technologies to Scale PIC Testing from Lab to Fab](#)
