Thursday, August 13, 2015

A new generation of quantum dot light emitters aims to outshine the rest.

Find out about upcoming episodes and more great video content coming to Photonics.com. [Click here](#) to sign up for the Light Matters Weekly Alert!

LED-Based Heating, Cooling Method Leads to Faster DNA Diagnostics

A system that exploits plasmonic materials to speed the thermal cycling of DNA solutions could enable point-of-care genetic testing.

'Biochemical Nose' Targeted for Home Sensing Market

The device uses a microfluidic control system for lab-on-a-chip automated liquid sampling. Nanoplasmonic resonators measure the interaction of photons with an activated surface using nanostructures to enable chemical and biological sensing.

OSA, Thorlabs Partner on Industry Fellowship

The fellowship will pair a qualified early career professional with a research opportunity in the division of ultrafast lasers, advanced imaging systems or novel optoelectronic devices at Thorlabs.

Featured Products

Optical/Illumination Design Software

Zemax LLC
The optical design package is ideal for imaging systems, afocal systems, laser systems, fiber coupling, and many others.

[More info >>](#)

Corporate Capabilities

Optometrics Corporation
Optometrics is an ISO 9001:2008 certified, Lean optical component and sub-assembly manufacturer of high quality, cost competitive reflective gratings, IR coatings, interference filters and much more.

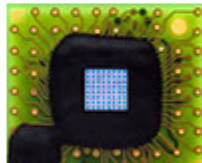

[More info >>](#)

Low Cost CNC Controlled Machines

OptoTech Optical Machinery
The SM 80 CNC generator and the SPO 80 CNC polisher make the ideal low-cost set of high speed CNC machines for Ø 5 to 80 mm.

[More info >>](#)

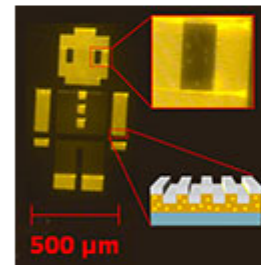

APDs for Rangefinders and LIDAR

First Sensor
For high-performance laser rangefinders and LIDAR systems, First Sensor offers the Series 9 avalanche photodiodes (APDs) with fast rise times and excellent responsivity in the 900 nm range.

More Articles on Photonics.com

Photonic Crystal Boosts QD Light Output

Combining quantum dot (QD) and photonic crystal technology could lead to brighter and more efficient displays and lighting.

AOA Xinetics Provides Deformable Mirror for Solar Telescope

Currently under construction in Hawaii, the Daniel K. Inouye Solar Telescope (DKIST) will offer unprecedented high-resolution, distortion-free images of the sun using adaptive optics technology.

Merck, Nano-C Launch Fullerene Derivatives for Photovoltaics

New chemistries improve lifetime and thermal stability while increasing open circuit voltage through environmentally friendly, nonhalogenated solvent systems.

[Read Article >>](#)

Theoretical Materials 'Invisible' to Light Waves

Materials that allow light to pass through without distortion are possible, according to a new set of calculations by an international team of researchers.

Industry Events

15th International Conference on Numerical Simulation of Optoelectronic Devices - Sept. 7-11 · Taipei, Taiwan

NUSOD Devices of interest include semiconductor lasers, LEDs, optical modulators and amplifiers, photodetectors, solar cells and photonic integrated circuits.
