Alluxa's ultra-narrowband filters, for applications such as laser cleanup, lidar, telecommunications and instrumentation, offer the narrowest and "squarest" filter profiles in the visible and NIR with very high transmission levels typically greater than 96%. Our proprietary advanced plasma PVD process uses durable, hard front surface coatings virtually impervious to environmental effects.

The New Goldeye
Allied Vision Technologies GmbH

Allied Vision Technologies' all-new Goldeye short-wave infrared camera (SWIR) provides best-in-class image quality through its compact, fan-less design, full 14-bit low-noise imaging and onboard image correction. Its GigE Vision interface, Power over Ethernet, comprehensive I/O control options, multiple fixation facilities, and more allow for easy integration into industrial and scientific imaging systems. Become "inspIRed" and visit our website for more information.
