Featured Products in This Issue

Spectroscopy-Certified™ Laser Diodes Photodigm Inc.

Request Info

Visit Website

Photodigm DBR lasers have made it possible to improve performance and reduce the size of tools used in atom cooling research. Their ultranarrow linewidth and extreme stability enable high-resolution spectroscopy for advanced gravimeters, magnetometers, atomic clocks and gyroscopes. Our laser diodes are Spectroscopy Certified for Rb, K, Cs and metastable He. They are preferred by users worldwide for emerging atom optics applications.

FRED Optimum Optical Engineering Software Photon Engineering LLC

Request Info

Visit Website

FRED Optimum Optical Engineering Software is capable of simulating the propagation of light through any opto-mechanical system by ray tracing. Whether the design is imported from CAD, a lens design program or constructed from within the software itself, FRED provides engineers with the essential tool for virtual prototyping of optical systems.
