PBM 101: Photobiomodulation Basics

Tuesday, January 09, 2018 1:00 PM - 2:00 PM EST

[Register Now](#)

About This Webinar

This webinar will provide a brief history of the use of light and color to diagnose and treat disease; review the science behind photobiomodulation (PBM); and present examples of "real world" applications where this emerging technology is being successfully used.

Presenter Robert S. Dotson, M.D., FAAO (board-certified, Ophthalmology) has been actively involved in researching and developing PBM technology for applications within ophthalmology for over 15 years and has become a leader in the field. In addition to founding two companies focused on developing PBM applications, Photospectra and LumiThera, he has served as a consultant to numerous commercial companies and academic programs.

Although PBM is gaining acceptance, the field is still in its infancy and many in the photonics community are not familiar with the concept of light as medicine. This webinar will provide you with an introduction to the science and application of PBM.

Mark Your Calendar

Date: Tuesday, January 09, 2018

Time: 1:00 PM - 2:00 PM EST

Space is limited. Reserve your Webinar seat now at: <https://attendee.gotowebinar.com/register/8261421791712881411>

After registering you will receive a confirmation email containing information about joining the Webinar.

SYSTEM REQUIREMENTS

PC-based attendees

Required: Windows® 10, 8, 7, Vista, XP or 2003 Server

Mac® -based attendees

Required: Mac OS® X 10.6 or newer

Mobile attendees

Required: iPhone®, iPad®, Android™ phone or tablet, Windows 8 or Windows Phone 8
