Presented by

About This Webinar

The beam envelope method is an efficient numerical tool for solving nonlinear optics in long and slender structures, such as optical waveguides, laser rods, and more. This webinar will demonstrate that the *Wave Optics, Beam Envelopes* interface in the Wave Optics Module, an add-on to the COMSOL Multiphysics® software, is suitable for analyzing various kinds of optical waveguides. You will learn how the *Wave Optics, Beam Envelopes* interface enables the analysis of long optics without having many mesh elements or any theoretical approximation, and you will learn how to set up a model. The speaker will also present advanced examples using the *Wave Optics, Beam Envelopes* interface. There will be ample time for Q&A at the end of the presentation.

About the presenter:

Yosuke Mizuyama, Ph.D., is an applications engineer at COMSOL. He has 23 years of experience in design, development, and production for consumer electronics. He joined COMSOL, where he develops photonics- and laser-related applications, in 2015. He received his doctorate in applied mathematics from Kyushu University.

Who should attend:

Researchers and engineers working for technical enterprises, research labs, and universities who are interested in easy-to-use software for modeling and simulation of real-world multiphysics systems. Optical engineers and designers in the automotive, aerospace, microelectronics, energy, medical device, and other fields that use optical waveguides will benefit from this webinar.

About COMSOL:

COMSOL is a global provider of software solutions for multiphysics modeling. Its COMSOL Multiphysics® product is an integrated software environment for creating physics-based models and simulation apps. Add-on products expand the simulation platform for electrical, mechanical, fluid flow, and chemical applications. Interfacing tools enable the integration of COMSOL Multiphysics® simulations with all major technical computing and CAD tools on the CAE market. Simulation experts rely on the COMSOL Server™ product to deploy apps to their design teams, manufacturing departments, test laboratories, and customers throughout the world.

Please see www.comsol.com/privacy for COMSOL's Privacy Policy. Contact COMSOL at www.comsol.com/contact for more information. Note that COMSOL will follow up with all registrants about this event and any related questions.

Mark Your Calendar

Date: Tuesday, September 17, 2019

Time: 2:00 PM - 3:00 PM EDT

Space is limited. Reserve your Webinar seat now at: <https://attendee.gotowebinar.com/register/9197097407693542923>

After registering you will receive a confirmation email containing information about joining the Webinar.

SYSTEM REQUIREMENTS

PC-based attendees

Required: Windows® 10, 8, 7, Vista, XP or 2003 Server

Mac® -based attendees

Required: Mac OS® X 10.6 or newer

Mobile attendees

Required: iPhone®, iPad®, Android™ phone or tablet, Windows 8 or Windows Phone 8

More from Photonics Media

Upcoming Webinars

- Accelerating the Commercialization of New Optics, Photonics, and Imaging Technologies, 9/5/2019 1:00:00 PM EDT
- Hands-On Digital Light: Spectral Design Tools for Human-Centric Lighting and Related Applications, 9/12/2019 10:00:00 AM EDT
- Deposition of Uniform and Laterally Graded Optical Interference Coatings, 9/18/2019 10:00:00 AM EDT

Archived Webinars

- High-End Asphere Design for Manufacturability
- Optical Metrology Solutions for the Semiconductor and Microelectronic Industries
- Keys to Success with Vision-Guided Robotics
