Measuring the Power and Beam Profile of Divergent Laser Sources

Thursday, May 20, 2021 1:00 PM - 2:00 PM EDT

Presented by

.: About This Webinar

Lasers with large beam divergence are used in a number of applications, such as remote sensing, optical communications, and materials processing. Large beam divergences create challenges for reliably characterizing lasers. This is primarily because the beam size from such lasers grows quickly over a short distance, and beam conditioning optics and sensors used to measure these beams can have a strong angular dependence.

In this webinar, Derrick Peterman, Ph.D., will discuss methods for reliably characterizing the beam power and profile of divergent sources, so that users will be able to better understand how their lasers are performing in critical applications.

Pictured: Depiction of divergent sources. Courtesy of Ophir.

Who should attend:

R&D, engineering, manufacturing/production, test, and measurement/QC professionals whose work involves lasers, especially those with large beam divergence. All those looking for an introduction or extended learning on how to characterize beam power and profile of divergent sources. The aim of this webinar is to help assess and troubleshoot beam profiles.

About the presenter:

Derrick Peterman, Ph.D., is sales director, Americas, for Ophir, an MKS Instruments company. He has worked with laser engineers and scientists on laser beam profiling applications for over 20 years. He can be reached at derrick.peterman@mksinst.com.

About Ophir:

Ophir is a brand within the MKS Instruments Light & Motion Division. The Ophir product portfolio consists of laser and LED measurement products, including laser power and energy meters, laser beam profilers measuring femtowatt to hundred-kilowatt lasers, and high-performance IR and visible optical elements. Ophir products enhance our customers' capabilities and productivity in the semiconductor, materials processing, life and health sciences, research, and defense markets.

Date: Thursday, May 20, 2021

Time: 1:00 PM - 2:00 PM EDT

Space is limited. Reserve your Webinar seat now at: <https://attendee.gotowebinar.com/register/8136429340549361933?source=Eblast>

After registering you will receive a confirmation email containing information about joining the Webinar.

SYSTEM REQUIREMENTS

Operating System

Windows® 7 or later, Mac OS® X 10.9 or later, Linux®, Google Chrome™ OS
Android™ OS 5 or later, iOS® 10 or later

Web Browser

Google Chrome™ (most recent 2 versions)
Mozilla Firefox® (most recent 2 versions)

Mobile Devices

Android™ 5 or later
iPhone® 4S or later
iPad® 2 or later
Windows Phone® 8+, Windows® 8RT+

.: More from Photonics Media

Upcoming Webinars

- Freeform Optics for Imaging: Design Methods, 5/26/2021 1:00:00 PM EDT

Archived Webinars

- Improving the Design of Optical Devices Through STOP Analyses
- Photonics in Quantum Computing and Quantum Networking
- *Photonics Spectra* Optics Conference 2021: April 27-28
