.: About This Webinar

Field-confocal optical coherence tomography (f-COCT) is a imaging technique based on a combination of confocal microscopy and low-coherence interferometry. It can generate cellular-resolution images, enabling the visualization of minute details of skin and真皮.

Dr. Jiaxiong Zhang, M.D., Ph.D., a medical oncologist at the University of California, San Francisco, will discuss the latest developments in f-COCT imaging and how these advancements are leading to new diagnostic tools for improved skin cancer management.

The webinar will cover key aspects of the latest advancements in f-COCT technology and their impact on the field of skin cancer research and treatment.

.: Your Calendar

Date: Tuesday, February 28, 2023
Time: 10:00 AM - 11:00 AM EST

.: More from Photomedica

Upcoming Webinars
- "Optical Coherence Tomography: A Tool for Skin Cancer Detection"
- "The Role of MicroRNA in Skin Cancer Development"
- "Advancements in Photodynamic Therapy for Skin Cancer Treatment"

Archived Webinars
- "Optical Coherence Tomography: Its Role in Cancer Diagnosis"
- "The Importance of Early Detection in Skin Cancer Management"
- "Photonic Technologies in Skin Cancer Research and Treatment"
