About This Webinar

Information from the universe can be more than just a two-dimensional snapshot. These digital assets can be transformed to enable us to listen to, feel, or virtually move through cosmic objects. Kimberly Armand, Ph.D., of NASA discussed how it is possible to listen to the distant stars and explore the cosmos. She shared some of the innovative ways that experts and nonexperts can explore astrophysical data through sonification, 3D printing, and extended reality.

Who should attend:

Engineers, researchers, and physicists who are interested in astrophysics and astronomy. Those who utilize 3D technology, optics, virtual reality, sonification, extended reality, and lasers. Professionals who are seeking a better understanding of multiwavelength astrophysics.

About the presenter:

Kimberly Armand Ph.D. is a leading expert in astronomy visualization and has been a pioneer in 3D imaging, printing, and extended reality applications with astrophysics data. She has worked for NASA's Chandra X-ray Observatory at the Smithsonian Astrophysical Observatory since 1998. She is an expert in studying the perception and comprehension of high-energy data visualization across the human-expert spectrum. Her current projects include simulation of orbital data, screen-based holograms, and other interactions of emerging technology and astrophysics. She has co-written eight nonfiction science books, including her first two science-related children’s books.

Date: Wednesday, March 8, 2023
Time: 1:00 PM - 2:00 PM EST

Space is limited. Reserve your webinar seat now at: https://attendee.gotowebinar.com/register/789712173605591327?source=etool

After registering you will receive a confirmation email containing information about joining the webinar.

System requirements

Operating System

Windows® 7 or later, Mac® OS X 10.9 or later, Linux®, Google Chrome™ OS Android™ OS 5 or later, iOS® 10 or later

Web Browser

Google Chrome™ (most recent 2 versions) Mobile Firefox® (most recent 2 versions)

Mobile Devices

Android™ 4 or later iPhone® 4 or later iPad® 2 or later Windows® Phone® 8.1, Windows® 10
