Electromagnetic Manipulation: Revolutionizing Machine Vision

Tuesday, March 5, 2024 1:00 PM - 2:00 PM EST

Register Now

Presented by

Join this webinar as Ryan Marti of Omron Automation delves into the realm of unique machine vision applications that push the boundaries of automation. Discover how machine vision technology can inspect cookies within the packaging, detect mold in rice for food safety, and even remove particulates from the air and cosmos. These groundbreaking solutions have the potential to revolutionize industries, ensure safer food and enhanced electronics, and unveil the universe like never before. In this session, Marti shares invaluable insights into the challenges faced in the machine vision and automation world and explores how to transcend normal visual spectrums to solve previously unsolvable problems. Get an exclusive firsthand look at the technologies and methodologies employed in these remarkable applications. Don't miss this opportunity to witness the power of machine vision in unlocking new possibilities for automation. Presented by Omron Automation.

Upcoming Webinars

What is the Role of Vibrational Spectroscopy in Surgery and Diagnostics?, 3/13/2024 1:00:00 PM EST
