Biophotonic Imaging for Medicine: A Digital Conference

Join us for a Webinar on Thursday, June 11, from 1 to 5 p.m. EDT

Researchers from around the world will present their latest work at "Biophotonic Imaging for Medicine: A Digital Conference." The online event will feature a series of 15- and 30-minute talks, each followed by a brief question-and-answer period.

Presentations will focus on a range of light-based imaging and microscopy techniques for diagnosing and assessing illness, and for studying other attributes and functions of biological tissue in a medical context. Topics include wavefront engineering for in vivo deep tissue imaging, deep UV excitation microscopy for slide-free pathology, quantitative phase digital holographic microscopy, photoacoustic analysis, multimode fiber endoscopy and surface-enhanced Raman scattering microscopy.

Keynote

Democratization of next-generation imaging, sensing and diagnostics tools through computational photonics

Aydogan Ozcan
University of California, Los Angeles

Featured Presentations

Wavefront engineering for in vivo deep tissue imaging

Lingjie Kong
HHMI Janelia Research Campus

Deep UV surface excitation microscopy for imaging unsectioned tissue: Realizing slide-free pathology

Richard Levenson
University of California, Davis
