## Satellite Imaging Reveals Easter Island Secret

The massive stone statues of Easter Island have mystified us ever since Europeans first landed on the island in 1722. How did these statues move as far as 18 kilometers over rugged terrain without even large animals to help? Now high-resolution satellite imaging has revealed the answer.

**Satellite Imaging Reveals Easter Island Secret**  
*High-resolution satellite imaging has revealed how the iconic statues have moved to every part of the island.*

The massive stone statues of Easter Island—called Rapu Nui by its inhabitants—have mystified us ever since Europeans first landed on the island in 1722. By then, the story of the 887 statues—or Moai in the Rapu Nui language—had been lost from the collective memory of the Rapu Nui people.
