

# PRODUCT SPOTLIGHT

## Learn about the Rhea Spectrometer Series

Admesy's Rhea is a flexible platform in configurable spectral measurement demands within the range between 200 and 1100 nm. Various choices in slit size, gratings, and sensors allow you to build the perfect spectral measurement solution for your specific high-end measurement application or OEM integration.

The Rhea series is available in a variety of optical configurations: 10 or 20-mm collimating lenses, cosine corrector and fiber connectors. This flexibility makes the Rhea the ultimate high-end spectroradiometer for OEM integration, display, lighting, and appearance measurements in both laboratory and production settings.
