Advances in Nanometer Precision Motion Control in Industry and Research

- 1) High performance motion control is key for automation and alignment applications, found in semiconductor manufacturing, laser/materials processing, optical inspection, or additive manufacturing. High-speed synchronization, high throughput and reliability are no longer mutually exclusive with sub- μm accuracy.
- 2) Nanopositioning mechanisms aid progress in fields as diverse as genomics, photonics, defense, and semiconductors. The latest designs include hexapods, compact air bearings and piezo-motors.

Advances in Nanometer Precision Motion Control in Industry and Research

Part I: High Performance Motion Control – Systems Approach Provides Nanometer Precision for Industrial Applications

Part II: Nanopositioning: A Step Ahead

PI (Parker Motion) Corp., 154 West Street, Auburn, MA 01501 | 401.553.1111 | 401.553.1111
