BRINGING LIGHT TO THE LIFE SCIENCES®

PRODUCT SPOTLIGHT

3 Lasers-IN-ONE – Discover the FISBA READYBeam™!

The development of diode emitters towards increasing power and variety, facilitated their usage in a rapidly growing field of scientific and industrial applications. In various cases it becomes possible to replace bulky gas or solid state lasers. The FISBA READYBeam™ is an extremely compact three color laser source. Different diode combinations are available covering the wavelengths 405, 450, 488, 638 and 660 nm. The laser module includes full electronics driver integration, active temperature regulation and the operating software. It's single mode fiber coupled.

FISBA Innovators
in Photonics

The individual channels can be modulated independently and are calibrated up to max. 40 mW power ex fiber. As a true «turn key» solution and as an OEM product the READYBeam™ facilitates the integration into existing instrumentation as well as their technological development and evolution. Download the READYBeam™ data sheet and connect with us to start a project or to ask a question.
