Robust 785 nm lasers for Raman by Cobolt

HÜBNER Photonics is one of the leading suppliers of all laser wavelengths to the high resolution Raman spectroscopy market and now introduces the 08-NLDM 785 nm ESP (enhanced spectral purity) as part of the Cobolt 08-01 Series.

The 08-NLDM 785 nm ESP is unique offering spectral purity of >60 dB @ 80 dB @ <5 nm from the peak, while the patent pending design ensures excellent wavelength stability and robustness. Cobolt now offers the widest selection of lasers for Raman spectroscopy, all with excellent wavelength stability and spectral purity and all with the same footprint. Run your system or experiment knowing the laser is dependable!
