WHITE PAPERS & APPLICATION NOTES

Illumination in Multispectral & Hyperspectral Imaging

Illumination in Multispectral & Hyperspectral Imaging

In recent years, multispectral and hyperspectral imaging has advanced rapidly into new applications and the required technology is now becoming more affordable in both the laboratory and the production environment. This whitepaper, from ProPhotonix' engineers, discusses key illumination considerations for spectral imaging including the differences between multispectral and hyperspectral imaging, image acquisition methods, the advantages of LED light sources, and LED light considerations.
