WHITE PAPERS & APPLICATION NOTES

Laser Sources for LiDAR Applications

RPMC has published an extensive amount of educational content on the fundamentals of LiDAR and LiDAR applications, including self-driving cars, windspeed monitoring, and active night vision imaging systems. Here, we'll take a different approach and discuss the wide variety of lasers that we offer for LiDAR applications. You will come away with an in-depth understanding of the 3 main categories of laser sources we offer for LiDAR signal generation; fiber lasers, DPSS lasers, and microchip lasers, as well as the primary brands we recommend and examples of LiDAR lasers.
