## WHITE PAPERS & APPLICATION NOTES

## Bridging the Terahertz Gap with Simulation Software

Technologies that leverage terahertz radiation have potential to be used in areas such as imaging, security, nondestructive testing, and quality assurance. However, these exciting technological possibilities are largely underused and untapped due to the hybrid nature of the terahertz spectrum, which lies between the microwave and far-infrared ranges of the electromagnetic spectrum. In this white paper, we cover how numerical simulation is unlocking the possibilities of the terahertz spectrum.
