Are Off-the-Shelf Optics Always the Best Solution?

A white paper from Resolve Optics addresses the commonly asked question "Are off-the-shelf optics always the best solution?". Today there exists a huge number of off-the-shelf lenses for mass market applications where unit cost is the dominant driving force. However when it comes to an application that optically requires anything a little more demanding such as high performance, high-resolution, compactness or a large image format then adopting an off-the-shelf lens typically will force you to accept a compromise in one or more aspects of optical performance.
