Light Matters

PHOTONICS MEDIA
NEWS

Light Matters, the photonics industry's premier weekly newscast, has a new look, new contributors and a fresh new focus on the business and technology of light that you just won't see anywhere else.

This week we travel to Baltimore for a look at the latest photonics technologies for defense, security and sensing. We'll also learn about how a new kind of invisible ink could save you from buying bogus goods and how terahertz spectroscopy could change how we look at the universe.
