Watch Light Matters, Win \$50!

Light Matters

PHOTONICS MEDIA
NEWS

Photonics was on the national stage this week as Vice President Joe Biden announced a new \$610 million manufacturing institute in New York.

We'll also learn about a new kind of microscope with promising capabilities for drug discovery, and check out an art installation that's lighting up San Francisco. Before we dive in, I want to mention a viewer survey that will help us cover more of the news YOU want. To make it worth your while, we're offering a \$50 Amazon gift card. Visit photonics.com/lmsurvey after the show to fill it out!
