Light Matters

PHOTONICS MEDIA
NEWS

On this month's episode of Light Matters, we'll see how a smartphone app could help cars drive themselves. We'll also check out some of the latest efforts to integrate optical technologies with electronics for computing, communications and more. But first we'll take a look at some novel methods for imaging, and learning about, the brain.

Starting in February, new Light Matters episodes will debut on the last Wednesday of every month. Join us again Feb. 24 for highlights from the Photonics West convention and expo!
