Hyperspectral Imaging Reopens Amelia Earhart Search

It's been almost 80 years since the U.S. Coast Guard lost communication with Amelia Earhart partway through her flight around the world. What exactly happened that day remains a mystery, but now, reassessment of previous discoveries using advanced imaging technology could help solve this intriguing enigma.

Also this month: scientists in Scotland are using laser scanning to ensure preservation of the historic Queen Mary turbine steamship, new technology has been developed that Purdue University researchers say will aid law enforcement in crime scene forensics, and we offer a sneak peek at the December issue of Photonics Spectra.
