In the original 'Light Matters' newsletter earlier, an inadvertent error occurred. We apologize for this error, and any inconvenience it may have caused.

## Lasers & Bacteria: Saving Lives - LIGHT MATTERS

Millions of unexploded landmines and ordnance from World War II are still buried in countries around the world, injuring hundreds of thousands of people every year. Now, efforts to detect and remove these explosives are making this much needed work more sophisticated ... and safer.

Also this month, Photonics Media announces its plans with CLEO's Tech Transfer program, PCM-22 takes its place as a new wonder material, and a roundup of the latest industry headlines with News in Focus.
