

Introducing *All Things Photonics*, a new podcast from the publishers of *Photonics Spectra* magazine. Join host Emmett Warren for intimate conversations with top scientists as they discuss how lasers, spectroscopy, optics, and more are being used for planetary exploration, robotic design, and advanced diagnostics.

Hear how 3D printed microscopes and smartphones offer the best hope for diagnosing disease in the developing world; how an array set up in Antarctica may soon provide long-sought evidence of the "Big Bang"; or how the work of an African-American physicist a century ago paved the way for spectroscopy's many exciting uses in the 21st century and beyond. Notable guests include UCLA researcher Aydogan Ozcan, Duke researcher Adam Wax, Harvard researcher Ben Schmitt, author and Clark Atlanta University professor Ronald Mickens, Nobel Prize winner Donna Strickland, and USC physicist Andrea Armani.

All Things Photonics airs every other Tuesday. [The first episode is out now.](#)

You can find episodes on Apple Podcasts, Google Play, Spotify, Stitcher, or your favorite podcast app, or streamed directly from Photonics.com/Podcast.aspx.
