

PHOTONLOOP

Shack Hartmann Wavefront sensor
Specification Sheet

III SPECIFICATION

PHOTONLOOP	
Lenslet array	150um pitch, 5.2mm focal length (custom available)
Frame rate	500fps with 100 centroids (1kHz on request)
Sensor size	11.34mm x 7.13mm Aperture diameter: 9mm
Trigger	External Trigger 5V
Communication	USB 3.0
Controller	Proportional-Integrative controller
Calibration	Influence functions and Hadamard
Control	Closed loop and Open loop
Programming	Programmable via Java Script
	Data Logging
	PSF Computation
Compatibility with other deformable mirrors	Alpao, Adaptica, OKO, BMC, Thorlabs and Dynamic Optics
Operating System	Windows 8/10 x64
