

Solscan

Multi-purposed 3D structured light scanner

Solscan offers a fast and reliable way to develop various 3D applications, giving system integrators, machine builders, and industrial end users a perfect tool to easily customize 3D applications. Solscan 3D scanning is based on structured light technology, and is capable of generating a massive and accurate point cloud on an object.

- Fast Scanning**
 Solscan completes a scanning process in about 1.5 seconds and outputs high-quality point clouds from six-axis(x, y, z, Nx, Ny, Nz) configurations.
- Color Function**
 Solscan is equipped with RGB cameras, making it possible to develop applications that are important in dealing with color differentiation.
- Complements Solomon 3D software** • **Genlcam 3D Interface**
 Solscan scanner is seamlessly integrated with AccuPick and Solmotion software, which have been used by customers in different applications.
- Dual Camera**
 Two built-in 2D cameras are constantly on the lookout for any fault with occlusion due to overlapping objects.
- Friendly GUI**
 Solscan comes with an easy-to-use GUI, and also software for point cloud export.

Solscan

Specifications

Module Name	SLM 3DSCN-0231C	SLM 3DSCN-0501C
Pixels	2.3 M	5 M
Camera Resolution	1920 x 1200	2590 x 2048
Field of View **	231 x 178 ~ 1033 x 778 mm	310 x 269 ~ 1202 x 1120 mm
Working Distance **	450 ~ 2000 mm	
Spatial Resolution *	0.24 ~ 1.07 mm	0.24 ~ 1.08 mm
Scanning Time	Minimum : 0.3 Sec	Minimum : 0.8 Sec
Scanning Technology	Structured Light Projection	
Projector Light Source	LED	
Interface	USB 3.0	
Dimensions	363 x 202 x 120 mm (L-W-H)	
Power	AC 100 ~ 240 V / 50 ~ 60 Hz	
Weight	3 kg	
Operating Temperature	0 ~ 40°C	

** Optional

* The product is not applicable to the transparent objects or objects with over 50% light reflection rate.

Applications

Object Recognition & Classification

Robot Guiding

Measurement

Object Scanning

Pick & Place

VR/AR 3D

User Applications

3D Dimensional Measurement	✓
Quality Inspection	✓
Object Recognition	✓
Pick & Place	✓
Mesh Generation	✓
Log File	✓
Export Formats	STL, PLY, OBJ, VRML, 3DS, FCS, TXT
