

Katana XP

High energy versatile picosecond laser module

Swiss
Made

The laser that can
adapt and synchronize
to any speed change

The **Katana XP** has been designed to offer synchronization compatibility with any industrial process. Its unique continuous repetition-rate tunability, in both slave and master operation modes, makes it the most versatile high energy laser on the market for fast, synchronous and precise industrial processes. The **Katana XP** can also operate in burst-mode, which allows generating pulses of arbitrary amplitude and sequence.

Far-field beam profile at 10 kHz repetition rate
and 400 μ J pulse energy

Laser outstanding features:

- External triggering
- Continuously tunable repetition rate
- Master/slave operation
- Pulse-on-demand
- Burst mode: programmable pulse sequence with arbitrary amplitude
- Adjustable pulse energy
- Diffraction-limited beam
- Narrow optical spectrum
- No ASE background
- Maintenance free – no alignment required
- Dust-sealed OEM package
- Complete remote control
- 24/7 operation

Options:
